(TR-104) PYTHON WITH AI/ML –

Training Day 4 Report:

Topic Covered: Git Conflicts & Medium Blog Writing

- The fourth day of training focused on understanding Git conflicts and how to handle merge conflicts efficiently.
- Git conflicts were explained as situations that occur when two changes conflict with each other during merging.
- Different methods to resolve merge conflicts were demonstrated, including manual editing and using Git commands.
- Best practices for avoiding conflicts, such as frequent commits and proper branching, were discussed.
- Information about Medium.com was introduced, including how to create and publish blogs.
- A blog was created on Medium about a Git topic to practice writing and publishing content. Published Blog Link is: here
- Overall, the session helped in learning conflict resolution in Git and improving technical writing skills.
