

(TR-104) PYTHON WITH AI/ML

Training Day 10 Report

Date: 23 January 2026

Topic Covered: JSON Module, File Handling & Python Revision

The tenth day of training focused on implementing calculator history functionality using the JSON module along with file handling concepts and revising previously covered Python topics.

- Implemented calculator history functionality using the JSON module and file handling concepts.
- Practiced reading existing history data from a JSON file.
- Appended new calculation entries to the history data.
- Saved updated history back to the JSON file for persistent storage.
- Revised Python basic concepts and previously covered programming topics.
- Revised file handling concepts including reading, writing, and updating files.
- Practiced lambda functions, closures, and list comprehensions through revision exercises.
- Improved understanding of structured data storage using the JSON module.
- Explored how history tracking functionality can be implemented in applications and games.
