

(TR-104) PYTHON WITH AI/ML

Training Day 103 Report

Date: 3 June 2026

Topic Covered: Daily Diary Documentation, Repository Management, Project Poster Design & Concept Revision

The hundred and third day of training focused on completing daily diary documentation, updating the project repository README file, designing the college project poster, and revising core concepts used in the IntelliClass project.

- Completed daily diary documentation for the TR-104 Industrial Training and ensured structured recording of all day-wise activities.
- Updated README.md file for the TR-104 daily diary repository with internship details, project overview, and repository structure.
- Documented repository organization including daily diary files, reports, and supporting project resources.
- Added personal academic details and LinkedIn reference for better professional presentation.
- Designed the college project poster for the IntelliClass AI-powered system with structured content including introduction, objectives, features, and system architecture.
- Organized visual elements for improved readability, clarity, and professional presentation.
- Reviewed and refined overall poster design alignment with project theme and academic requirements.
- Guided a peer through basic concepts including Generative AI fundamentals, hallucinations, prompt engineering, API usage, and Gemini API overview.
- Explained differences between Traditional AI and Generative AI along with prompt writing techniques and examples.
- Introduced Google AI Studio and API usage concepts for experimentation with AI models.
- Revised concepts related to Generative AI, prompt engineering, hallucinations, APIs, Gemini API usage, and AI model interaction basics.

Overall, the training enhanced understanding of AI fundamentals, prompt engineering, project documentation, repository management, and academic project presentation skills.
