

(TR-104) PYTHON WITH AI/ML

Training Day 3 Report:

Date: 14 January 2026

Topic Covered: Notion Documentation

The third day of training focused on understanding Notion and its use for documentation and task management.

- Notion was introduced as a productivity tool used for creating notes, documents, databases, and project trackers within a single workspace.
- Different features of Notion such as pages, templates, tables, and checklists were explained during the session.
- The role of Notion in organizing training content, tasks, and project documentation was discussed.
- The importance of maintaining structured and clear documentation during the internship period was highlighted.
- Practical work was performed in Notion by creating pages, writing notes, and organizing training-related information.
- A Notion page was created and published as part of the practice activity.
