Training Day 100 Report

Date: 29 May 2026

Topic Covered: Project UI Enhancement, Documentation Refinement, Project Branding & Report Improvement

The hundredth day of training focused on improving the IntelliClass project UI, refining academic documentation, enhancing project identity through branding updates, and reviewing final report components for submission readiness.

- Worked on enhancing the overall UI of the IntelliClass college project and implemented multiple design improvements.
- Refined interface components to improve visual consistency, layout structure, and overall user experience.
- Updated and corrected the project synopsis and mid-term training report documentation.
- Reviewed and improved documentation content formatting for better clarity and professional presentation.
- Created a new project name and designed a new logo to establish a unique and professional project identity.
- Analyzed system diagrams and reviewed final report structures to ensure proper representation and alignment.
- Examined all report components and supporting documentation required for final submission.
- Provided content for the Generative AI poster and ensured alignment with project theme.
- Converted project-related form into a QR code for easy access and integration.
- Improved consistency across UI design, documentation structure, and project presentation materials.
- Revised concepts related to UI/UX enhancement, academic documentation refinement, system design analysis, and project branding strategies.

Overall, the training enhanced understanding of UI design improvement, project documentation refinement, branding development, and structured academic reporting for final submission readiness.
