Training Day 98 Report

Date: 27 May 2026

Topic Covered: Mid-Term Training Report LaTeX Formatting, Documentation Structuring & Academic Report Enhancement

The ninety-eighth day of training focused on improving the LaTeX formatting of the IntelliClass Mid-Term Training Report, enhancing academic structure, refining document layout, and ensuring proper presentation standards for final college submission.

- Worked on formatting and structuring the IntelliClass Mid-Term Training Report in LaTeX according to official college submission guidelines.
- Organized and aligned all chapters, sections, headings, tables, and page layouts for professional academic presentation.
- Improved title page design, chapter styling, spacing, margins, and page numbering consistency in LaTeX.
- Arranged complete report structure including Table of Contents, List of Figures, References, and Output Screens sections.
- Enhanced placement and alignment of system diagrams, flowcharts, ER diagrams, and screenshots within the document.
- Refined formatting consistency across all chapters to ensure uniform academic documentation standards.
- Updated and optimized LaTeX code for better readability, structure, and maintainability of the report.
- Reviewed overall report layout and ensured readiness for final college submission.
- Improved visual presentation of technical content including diagrams and system workflow illustrations.
- Revised concepts related to LaTeX document formatting, academic report structuring, layout design, and professional technical documentation practices.

Overall, the training enhanced understanding of advanced LaTeX formatting techniques, academic report structuring, and professional documentation standards required for technical project submissions.
